The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Ej king 5.0 out of 5 stars They took full power from 1500watt boss phantom amp. This is

actually a 12. <http://mericschool.com/files/fckeditor/convert-manual-rv-awning-electric.xml>

5 which isn't listed in details. Had to make box hole bigger just to fit it in. The lining is enormous and I plan on buying a bunch of these with no less than 2000 watt amps. Great sub, it eats kicker subs for breakfast. I recommend for everybody! The subs sound great. Lots of cone excursion and very responsive. Producing a good bit of SPLs. They are by no means a competition subwoofer, but for 100 bucks each, they will flex your sheet metal, and knock your rearview off the windshield. Shipping was kinda slow, but easy. The packaging was very good. Overall I am very satisfied with these badboys. Authorized Internet Dealer If it is found to be defective, it may be returned to OnlineCarStereo.com for replacement within 1 year from the original date of purchase with proper return authorization. Write a review It also lacks on some low tones too. It seems to distort right when you think it's gonna knock your socks off, forcing you to turn it down a little or risk blowing the sub. It also has trouble with fast transitions, as in the sub is not all that quick. I mean, this thing is built like it's preparing for a 9.5 earthquake, but it doesn't live up to its appearance. Honestly, I think Boss Audio overrated this sub quite a bit. When you factor in the price, I would say it's pretty good for your money, but I would rate it with other 500 watt RMS subs, not 1000 watt subs. I feel that Boss just tried to hit the market with a product that looks powerful, but performs in the class below the one it's supposed to be in. I could see, however, that if you had 2 or 4 of these and gave em 400 500 watts each, you could have yourself a budget system that slams. In Conclusion A powerful sub, to a point. You have to treat this sub like a 500 watts sub. Please check your inbox, and if you can't find it, check your spam folder to make sure it didn't end up there. Please also check your spam folder. If you feel uncomfortable performing the install consult a professional installer.

Never connect the negative speaker leads to chassis ground. Do not combine outputs for use with 2 speakers. Do not ground negative speaker leads to the chassis ground. If this is not done, the vehicle battery may be drained when you are away from the vehicle for several hours. To avoid shortcircuiting, cover all disconnected lead with insulating tape. There is a possibility of shortcircuiting if the leads are not insulated. Do not route wiring in places that get hot, such as near the heater outlet. If the insulation of the wiring melts or gets torn, there is a danger of the wiring short circuiting to the vehicle's body. This will damage the lead's insulation and cause a very dangerous short. The current capacity of the lead will be exceeded, causing overheating. Connect to an external power amp's system remote control or the car's Autoantenna relay control terminal max. 500mA 12V DC. Never replace a fuse with another of a different value. If the fuse blows again please contact your installation company. After pushing the button, wait a few seconds for the red light to flash. The following tools and supplies may also be needed for the installation IMPORTANT Remove the two transport screws from the top of the unit before installing. Pull to remove the old unit from the dashboard. Consult wiring diagram of existing head unit before disconnecting any wires. If you are not positive of the polarity of the existing wires from the speakers to the head unit, install new wires. Before you start learning how to read UML diagram, it's very important that you have a basic knowledge of how it works. It is a graphic representation of the business of a solution and how the structure functions. It is an easy-to-read representation which makes it possible to understand better.
